

## Application for use of frequency for broadcasting network

### Information about the applicant and system

The Norwegian Communications Authority (Nkom) may issue frequency licences for broadcast. In accordance with the Norwegian Electronic Communications Act of 4 July 2003 and regulations, Nkom may attach conditions to the licenses.

The application includes two parts. Information about the provider and system and technical information of each site. Technical information for each site must be provided.

Fill in one form for each system.
